## FOR IMMEDIATE RELEASE

### Lane Closure Report for the week of 5/6/13 – 5/12/13

*Inyo, Mono & Kern Counties* – The California Department of Transportation (Caltrans) would like to alert the traveling public to be careful of workers on the Highway and to Slow for the Cone Zone and Move Over where possible. The schedule for lane closures for the week of May 6 through May 12, 2013:

Mono County – US Hwy 395 – Lee Vining area – Curb, Gutter, and Sidewalk Work

Inyo County – US Hwy 395 – Mandich Lane to US Hwy 6 – Crack Seal Operation

Inyo County – SR 190 – Olancho Darwin Road – Crack Seal Operation

Kern County – US Hwy 395 – Kern/Inyo County Line – Crack Seal Operation

San Bernardino – SR 127 – Shoshone area – Crack Seal Operation

Entire District – US Hwy 395 – Digital 395 Project – Be aware of lane closures – Possible delays.

Caltrans performs periodic crack sealing because it is one of the most cost effective road pavement preservation tools available. Sealing cracks in asphalt pavement is a commonly used maintenance procedure which reduces pavement deterioration by eliminating surface water penetration into underlying base and sub-base layers. Cracks left untreated will lead to more cracks, alligator cracking, potholes and sub-base failure.

**When approaching a lane closure the traveling public is advised to reduce their speed, observe the Caltrans signs, and watch for personnel and equipment working on the highway.**
